# **Basic Detail Report**

## Lantern

#### **Date**

Late 19th century

## **Primary Maker**

Kevork

#### Medium

Metal (brass)

## Description

This lantern has a circular lid at the top on which a number of fragmented diamond shaped holes are present. The lid is also surrounded by a circle composed of square

holes. The handle on the top has a moveable hook in the middle. When lifted with a handle the latern will extend like an accordian. The diamond shaped holes are present along the boundary on the bottom of the lantern. On the bottom is also a floral element situated in the middle with six bigger protruding parts and six smaller ones around the circle of the floral element.

#### **Dimensions**

11 X 11 X 12 (when fully extended)
