

Basic Detail Report

designs.

Dimensions

33.68 x 28 cm, 1.2 to 1.5 cm thick

San Antonio de Padua

Medium

Tempera on yeso on adzed pine panel.

Description

Very empty design, pale blue habit, gray outlines, large dots in corners, fan-shaped space fillers, palm gray, Nino in pale earth red dress. Figure has a slight droop, cf. other panels, NFD-R-37 and Lois Field, who has a nearly identical panel to this one. Field panel belonged to Samuel Guernensey, archaeologist, who is said to have gotten it in NM ca 1920. Not common type but very recognizable on account of spinal droop in all panels, also empty
