

Basic Detail Report

Custodia

Date

2016

Primary Maker

Cleo Romero

Medium

Tin, glass, solder

Description

Tin ceremonial object, used for holding wafers for communion. In the middle is a six-sided tin enclosure with a door on one side for accessing the wafers. Both sides

have glass windows. Surrounding this central area are many radiating tin pieces. On the outside are six half-moon shaped tin pieces, that protrude from the center. This whole top part is attached to a three - level shaft with two six-sided breaks and a larger, similarly formed base. The candlestick is stamped over all but the shaft.

Dimensions

22 13/16 × 10 7/16 × 5 1/8 in. (58 × 26.5 × 13 cm)
